Energy Efficient AC Motors

IE2 Efficiency class

Apex Series
a green solution

Crompton Greaves (CG) is part of the US\$ 4 bn Avantha Group, a conglomerate with an impressive global footprint.

Since its inception CG has been synonymous with electricity. CGs India operations were established in 1937, and since then the company has retained its leadership position in the management and application of electrical energy.

Today, Crompton Greaves Indias largest private sector enterprise. It has diversified extensively and is engaged in designing, manufacturing and marketing technologically advanced electrical products and services related to power generation, transmission and distribution, besides executing turnkey projects. The company is customer-centric in its focus and is the single largest source for a wide variety of electrical equipments and products. With several international acquisitions, Crompton Greaves is fast emerging as a first choice global supplier for high quality equipment through its three business groups viz;

Power Systems :

- Transformer ● Switchgear ● Power Quality
- Engineering Projects

Industrial Systems :

- Motors ● Alternators ● Drives
- Railway Signalling ● Stampings

Consumer Products :

- Fans ● Appliances ● Lighting
- Integrated Security Solutions & Home Automation
- Pumps

AVANTHA
GROUP COMPANY

Crompton Greaves Ltd

As one of the worlds leading engineering corporations,CG provides end-to-end solutions,helping its customers to use electrical power effectively and to increase industrial productivity with sustainability. CG was established in 1937 in India; and,since then the company has retained its leadership position in the management and application of electrical energy.

CG is leading manufacturer of electric motors,with motor solutions,which benefits a wide range of customers. Our products are used in almost every industrial application including general manufacturing, petrochemicals, food processing, pharmaceuticals where they drive fans, pumps, compressors,conveyors,lifts and cranes,amongst other things

Our core competencies lie in our design facility conforming to the international quality standards. We make continuous effort,to bring out the latest,most advanced product into market-place. We continuously add many new services,features and introduce new solutions so as to ensure complete customer satisfaction.

Apex Series

Apex IE2 series is a green solution by CG to save energy,as growing cost of energy calls for power savings at each possible step of manufacturing. Electric motor driven systems used in industrial process consume about 70% of electricity.

These motors are complying with new efficiency requirements of IEC60034-30:2008 Apex aluminium motor range covers ac squirrel cage induction motors with output from 0.75kW to 7.50 kW in frame sizes GD80 TO GD132M. Apex series cast iron range covers ac squirrel cage induction motor with out put from 0.75 kW to 250 kW in frame NG80 to ND355LX. They are being used in various range of application from food processing to chemical & heating to refrigeration.

Quality assurance

Stringent quality procedures are observed from first design to finished product in accordance with the ISO9001 documented quality systems. All of our factories have been assessed to meet these requirements,a further assurance that only the highest possible standards of quality are accepted.

Benefits of Apex Series Motors

- High efficient at low running cost
- Low vibration and noise
- High torque with smooth acceleration

Multi Mount

(Aluminium motor range upto 7.5 kW)- By simply changing the position of feet,user is able to convert right,left or top terminal box position and by changing the standard end shield user can change it for flange or face version.

IEC 60034-30:2008 Specifications

International Electro technical Commission (IEC) standard IEC 60034-30:2008 defines energy-

efficiency (IE code) classes for single speed,three-phase,50 and 60 Hz induction motors.

The efficiency levels defined in IEC 60034-30 are based on test methods specified in IEC 60034-2-1:2007

The standard defines three International energy efficiency classes (IE classes).

- IE1 = Standard efficiency (EFF2 in the former European classification scheme)
- IE2 = High efficiency (EFF1 in the former European classification scheme and equivalent to EPAct in the USA for 60 Hz)
- IE3 = Premium efficiency (equivalent to NEMA Premium in USA for 60 Hz)

The standard covers almost all motors (for example standard,marine,brake motors,gearred motor)

- Single speed,three-phase,50 Hz and 60 Hz
- 2,4 or 6 poles
- Rated output from 0.75 to 375 kW
- Rated voltage up to 1000 V
- Duty type S1 (continuous duty) or S3 (intermittent periodic duty) with a rated cyclic duration factor of 80 percent or higher
- Capable of operating direct online

The following motors are excluded from the standard :

- Motors made solely for converter operation.
- Motors completely integrated into a machine (for example,pump,fan or compressor)that can not be tested separately from the machine.
- Motors rated for duty cycles S4 and above except if an equivalent S1 duty is specified by the driven equipment manufacturer.

IEC 60034-2-1:2007 Specifications

The standard introduces new rules concerning the testing methods to be used for determining losses and efficiency. It offers two ways of determining efficiency; the direct and indirect methods. The standard specifies the following parameters for determining efficiency using the indirect method:

- 1) Reference temperature
 - 2) Four options for determining PLL (additional load losses):
 - a. Measurement- PLL calculated from load tests
 - b. Estimation- PLL at assigned value 2.5% -1.0% of input power at rated load between 0.1 kW and 1000 kW
 - c. Mathematical calculation - Eh star -alternative indirect method with mathematical calculation of PLL
 - d. PLL from removed rotor and reverse rotation test
- Winding losses in stator and rotor are determined at (25°C + actual temperature rise measured)

The resulting efficiency values differ from those obtained under the previous IEC testing standard, IEC 60034-2:1996.

It must be noted that efficiency values are only comparable if they are measured using the same method.

Apex series Aluminium motors (GD Frames)

Range
Output 0.75 kW to 7.50 kW
Frames GD 80 TO GD 132
Poles 2,4,6

Specification	Standard Product	Option
Frame sizes	80 to 132	-
Enclosure	IP55	IP56, IP65
Mounting option	Foot (B3)	Flange (B5), Face (B14) or Pad (B30)
Terminal box position	Top	Left hand side (LHS), Right hand side (RHS)
Voltage	3 kW and below: 400 λ 4 kW and above: 400 Δ	380 λ 380 Δ Others on request
Frequency	50 Hz	60 Hz
Cooling	IC411	IC410
Lubrication	Frame 80 to 132 double-shielded bearings	-
Insulation	Class F	Class H
Temperature rise	Class B	Class F
Paint color	Gentian blue (RAL 5010)	On request
Fan cover	Steel	Plastic
Thermal protection	-	80 to 132 frames
Anti condensation heaters	-	132 frame
Inverter Duty (with derate)	Variable Torque - 10:1, Constant Torque - 2:1	Alternative speed range
Ambient temperature	- 20°C to + 50°C	Higher than 50°C
DC brake	-	80 to 132 frames
Altitude	≤ 1000m	Higher than 1000 m

The above specification and options give a brief summary of features available for the Apex aluminium range.

For a full listing of optional features, please contact CG sales

Apex series cast iron motors.(NG,ND Frames)

Range
Output 0.75 kW to 250 kW
Frames NG80 to NG132M ND160M to ND355LX
Poles 2,4,6

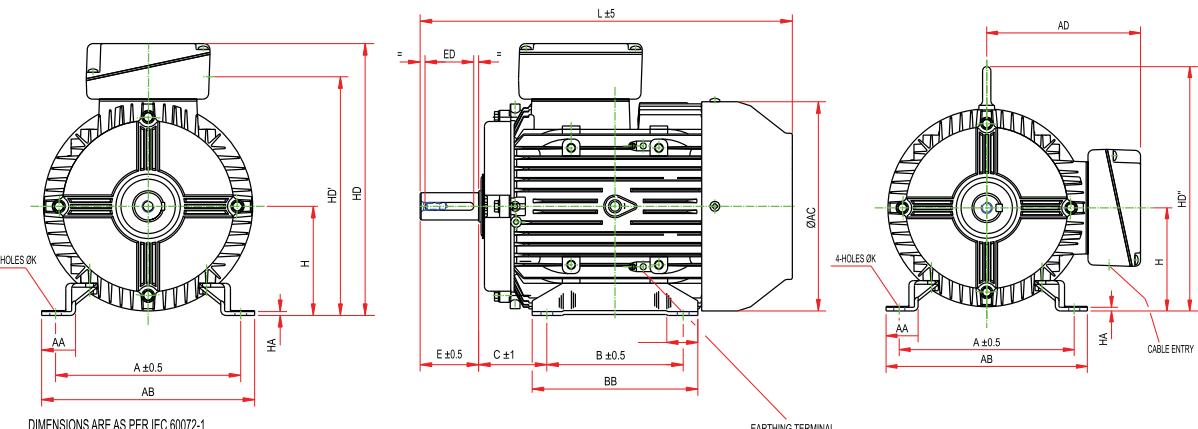

Specification	Standard Product	Option
Frame sizes	80 to 355	-
Enclosure	IP55	IP56
Mounting option	Foot (B3) mounting feet integral with the Stator body	Flange (B5), Face (B14) - upto 132 Frame
Terminal box position	Top	Left hand side (LHS), right hand side (RHS)
Voltage	3 kW and below: 400 Λ 4 kW and above: 400 △	380 Λ 380 △ Others on request
Frequency	50 Hz	60 Hz
Cooling	IC411	IC410
Lubrication	Frame 80 to 225 double-shielded bearings Frame 250 to 355 online Greasing	-
Insulation	Class F	Class H
Temperature rise	Class B	Class F
Paint colour	Gentian blue (RAL 5010)	On request
Fan cover	Steel	-
Thermal protection	-	80 to 355 frame
Anti condensation		
heaters	280 to 355 frame	132 to 250 frame
Inverter Duty (with derate)	Variable Torque - 10:1, Constant Torque - 2:1 (for frame 80 to 132)	Alternative speed range
Ambient temperature	- 20°C to + 50°C	Higher than 50°C; Less than -20°C
DC brake	-	80 to 200 frame
Altitude	≤ 1000m	Higher than 1000 m

The above specification and options give a brief summary of features available for the Apex cast iron range.

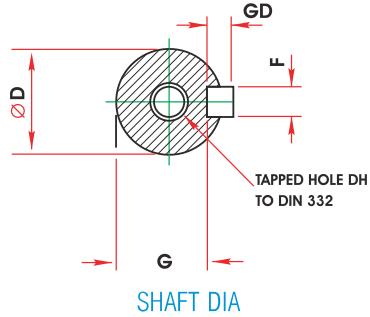

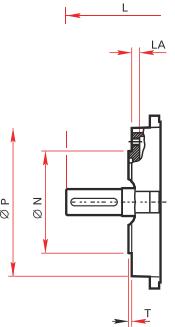

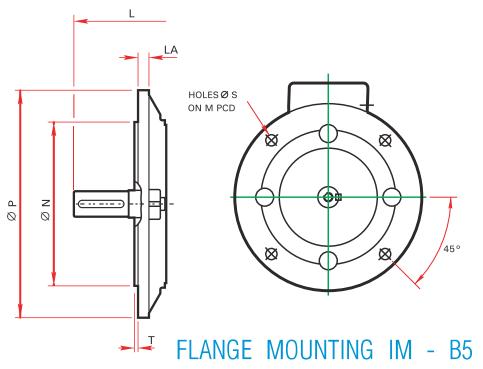

For a full listing of optional features, please contact CG sales
